

ABDULLAH ESSAM

FLUTTER DEVELOPER

Cairo, Egypt | ounabdallah216@gmail.com | <https://github.com/Aboody241>

SUMMARY

a Motivated Junior Flutter Developer with hands-on experience building production-ready mobile and web applications using Flutter, Firebase, Clean Architecture, Bloc/Cubit, and REST APIs. Experienced in developing complete applications from UI implementation to backend integration with a strong focus on performance, maintainability, and user experience

SKILLS

- Dart - Backend Integration - Responsive UI - Error Handling - SOLID - Riverpod	- Flutter - Firebase - Supabase - REST APIs - Bloc / Cubit - Providor	- Clean Architecture - Dependency Injection - GitHub - Figma - Postman
--	---	--

PROFESSIONAL EXPERIENCE

Flutter Developer (Freelance) - Developed responsive Flutter applications for local businesses. - Built digital menu web applications for restaurants and cafés. - Integrated Firebase services including Authentication, Firestore, and Storage. - Optimized application performance using image caching and pagination. - Collaborated directly with clients to gather requirements and deliver solutions.	Jul 2026 - Present
Flutter Developer (Volunteer) – FAD Community - Collaborated with Flutter, Backend, Frontend, and UI/UX teams on real-world software projects. - Used GitHub workflows including branches, pull requests, and code reviews. - Participated in Agile-inspired development processes and technical discussions. - Contributed to building scalable Flutter applications within a collaborative environment.	Jun 2026 - Present

PROJECTS

Multiverse Mentor – AI-Powered Learning Platform Our Start Up - Built a cross-platform Flutter application powered by an AI learning assistant. - Integrated AI technologies including Ollama, Qwen, and Retrieval-Augmented Generation (RAG). - Designed a personalized learning experience based on user profiles and learning styles. - Collaborated with Python backend services and modern AI infrastructure.	Oct 2025 - Present
Full Delivery System - dashboard - backend - mobile app Github - Developed a production-ready Flutter application using Clean Architecture. - Implemented Firebase Authentication and Cloud Firestore. - Built product catalog, orders, checkout, and admin functionalities. - Applied Bloc/Cubit state management and reusable UI architecture. - Optimized performance using image caching and modular architecture.	Jul 2026 - Aug 2026

EDUCATION

B.Sc. Computer Science Technology

Sep 2026 - Sep 2030

EL SEWEDY UNIVESITY OF POLYTECHNIC

- Computer Science Technology program at ElSewedy University of Technology (SUT)

ADDITIONAL INFORMATION

- **Languages:** English, German
- **Awards/Activities:** ISEF Finalist – Qualified for the national finals of the International Science and Engineering Fair (ISEF) with an innovative research project., IEEE Finalist – Advanced to the finals of an IEEE innovation competition with a multidisciplinary engineering project. YESIST12 Malaysia 2025 – Represented Egypt by presenting our project at the IEEE YESIST12 international competition in Malaysia. USAID Square One 2024 – Received a volunteer certificate for participating in the Square One Innovation Camp for Applied Technology Schools, organized with USAID. 1st Place – Young Innovators Competition (Assiut) – Awarded first place for an innovative technology project.
